

Precision Therapy

Minimally invasive
alternatives to surgery

National
VASCULAR
Physicians

No scalpel required

Thanks to medical advances, many diseases and chronic health problems can now be treated without open surgery, hospitalization and a long, painful recovery.

With vascular and interventional radiology, treatments are performed inside the body... with specially trained doctors using catheters and miniature devices precisely guided through the bloodstream by medical imaging. Not only is this less traumatic to your body than surgery, but it requires no general anesthesia and lets you avoid many of the risks and side effects associated with surgery.

Experience Matters

The board-certified vascular and interventional physicians at National Vascular Physicians (NVP) are among the most highly educated and trained doctors in the United States, each having completed more than 13 years of education and training, including an additional 2-3 years of subspecialty (fellowship) training in Vascular & Interventional Radiology. In addition, each of our doctors has been in clinical practice for 10 or more years— a level of experience that most of our competitors simply cannot match.

Treatment Options

Knee osteoarthritis

- Genicular artery embolization

Uterine fibroids

- Uterine fibroid embolization

Enlarged prostate

- Prostate artery embolization

Chronic hemorrhoids

- Hemorrhoidal artery embolization

Our Doctors

Alexander Kim, MD

Alexander Y. Kim, MD, FSIR is a nationally recognized and board-certified Vascular & Interventional Radiologist. He is a national leader in the treatment of liver cancers, uterine fibroids, and symptoms of benign prostate hyperplasia (BPH). He has led or participated in various clinical trials and has written a number of publications and book chapters regarding the treatment of these disease processes.

Emmett Lynskey, MD

Dr. Lynskey is board-certified in both Diagnostic and Vascular and Interventional Radiology. He has presented numerous papers and spoken as an invited lecturer at numerous local, national and international meetings. He is a member of the Society of Interventional Radiology, American College of Radiology as well as numerous other societies, including the Alpha Omega Alpha Medical Honor Society.

National VASCULAR Physicians

National Vascular Physicians is a vascular and interventional radiology practice with locations in National Harbor and Rockville, MD and Roanoke, VA. We perform minimally invasive treatments and procedures for a number of health conditions and diseases.

We offer the full range of minimally invasive vascular and interventional radiology services at each of our DC-area and Virginia locations. Vascular disease, orthopedic conditions, uterine fibroids, enlarged prostate and more can be treated faster, less expensively and with greater precision and safety than ever before.
